

Dr. Weeks received her BS from Oregon State University and PhD in Genetics from the University of Washington. She worked for 13 years in the biotech industry at multiple large and small drug development companies in Seattle. Her career took her from bench scientist to company director which meant involvement in business and regulatory decisions as well as discovery science. She was Program Manager for Science Outreach at Northwest Association for Biomedical Research (NWABR) for nine years. She was responsible for curriculum development and workshops for teachers, educational conferences for researchers and a variety of science outreach programs and collaborations. Currently she is Program Coordinator for Shoreline Community College's biotech summer camps for high school students. She also teaches classes at Edmonds Community College Creative Retirement Institute. She is an active member in Association for Women in Science (AWIS), Organization for Regulatory and Clinical Associates (ORCA) and Northwest Science Writers Assn.
