

**Dr. Fran Solomon** is an environmental biologist, with a bachelor's degree in biology, master's degree in environmental health, Ph.D. in fisheries, and 25 years of work experience in environmental agencies. She loves bringing her knowledge and experience to the classroom and is especially enthusiastic about sharing information on hormone-disrupting chemicals. Dr. Solomon teaches at Western Washington University and gives continuing education courses and lectures for environmental and health care professionals and the general public. She has taught at universities in China, Canada, and Japan. Dr. Solomon is passionate about encouraging young people to study science, technology, engineering, and math (STEM) and to pursue STEM careers. She was a founder and Past-President of the Association for Women in Science, Seattle chapter, and she co-chairs the chapter's scholarship program. Outside of teaching and mentoring activities, she is an avid hiker and international traveler, and is pursuing a lifelong interest in singing.
