

**Dr. Novack** earned his PhD in Pharmacology at the University of Washington School of Medicine. He did post-doctoral research in immunology at the Fred Hutchinson Cancer Center. He has been teaching immunology, pharmacology and histology at the medical school level for over 22 years and has also taught microbiology, physiology, pathology and histology. He has additional teaching experience in microbiology, nutrition, pathophysiology, anatomy and physiology at the undergraduate and Master's levels. Currently, Dr. Novack teaches at Pacific Northwest University College of Medicine. His research interests include nutrition, natural products, autophagy and the interactions with other pathways such as nrf2 and NF Kappa B. He is also a certified cycling instructor, an avid live theater patron and occasional participant and cycles and hikes outdoors.
