

Mansi Kaushik

Program Manager & Technical Manager
Instructor: Camp BIOMed, NWABR.

Ms Kaushik comes from New Delhi, India. She did her Bachelors in Engineering (Major Biotechnology) & Master in Technology (Major Biotechnology) from India. After completing her training in Quality Control Department of Panacea Biotech and Defense Research & Development Organization, India, she came to USA. With her keen interest in biomedical sciences and a tilt towards Clinical Research, she got her certification as Clinical Research Association (CRA). Later she completed her specialization course in “Drug Discovery & Design” from University of Washington. She also holds a certification in Microsoft technologies (.Net, testing and automation), which further sharpens her technical skills.

With her experience and background in biotechnology, technical skills, family legacy in the field of education and her decision to make a career in this field, she joined NWABR in 2014 as a program manager where she launched the summer program – Camp BIOMed: A summer camp for high school students. Since then she has been working for Camp BIOMed and other educational programs of our organization. She has been instructing forensics track- CSI for camp BIOMed since 2017.

In her free time, she enjoys travelling, scrapbooking, painting and meeting people.
