

Youth Ethics Summit:

Vaccination Ethics and Policy

Saturday, October 12, 2019

Sponsored by the Northwest Association of Biomedical Research

Recent measles outbreaks have led to increased conversations about vaccination policies. Students are wondering: Why do we need vaccines? Should vaccinations be mandatory? Should teens be able to make their own decisions about whether they are vaccinated or not? Is it true that vaccinations save lives? What is herd immunity?

NWABR is sponsoring an opportunity for high school students to come together to explore the following question:

Why do vaccinations continue to raise ethical controversies and policy challenges even though we know they are responsible for preventing diseases and saving lives?

Join us as we investigate these topics:

- Vaccine Research and Testing
- Vaccine Safety
- Mandatory Vaccinations
- Minor Consent
- Access Disparities
- Global Challenges

Time: 10:00 am to 4:00 pm

Where: [PATH](#) 2201 Westlake Ave. Seattle, WA 98121

Cost: Free! A complimentary lunch is provided.
